

**Software Engineering, BS**  
**Bachelor of Science, 2017 Catalog Year**  
 TSSERBS

Name: \_\_\_\_\_  
 ID: \_\_\_\_\_

**Primary Focus: To Be Determined**

Notes: \*\* See CIDSE website or Advisor for Secondary Focus requirements.  
 Shaded courses designate critically tracked requirements.

Prerequisite —————> Co-requisite - - - - ->

\*\*\* Requires placement exam score and may require additional courses dependent on placement.  
 \* Lab Science Options: CHM113 & CHM116, BIO181 & BIO182, BIO201 & BIO 202, GLG101/103 & GLG102/104, PHY131/132  
 Color Coding Key: **Completed Requirements** **Enrolled** **Need to Retake**

Cultural \*\*\*  
 Global  
 Historical \*\*\*

Term 1:

**CSE 110: Principles of Programming with Java** -Concepts of problem solving using Java, algorithm design, structured programming, fundamental algorithms and techniques, and computer systems concepts. Social and ethical responsibility.

**MAT 265: Calculus for Engineers I**-Limits and continuity, differential calculus of functions of one variable, introduction to integration. Not open to students with credit in MAT 270

**FSE 100: Introduction to Engineering**-Introduces the engineering design process; working in engineering teams; the profession of engineering; engineering models, written and oral technical communication skills.

**ASU 101-CSE: The ASU Experience**

**ENG 101: First-Year Composition**

Term 2:

**CSE 205: Object-Oriented Programming & Data Structures**-Problem solving by programming with an object-oriented programming language. Introduces data structures. Overview of computer science topics.

**MAT 266: Calculus for Engineers II**-Methods of integration, applications of calculus, elements of analytic geometry, improper integrals, Taylor series

**ENG 102: First-Year Composition**

**EGR104: Critical Inquiry in Engineering** - Critical thinking. Systematic evaluation of information as input to well-informed decision making. Close reading and substantive writing in a technical setting

Term 3:

**SER232: Systems Fundamentals I** - Logic design and computer organization; number systems and arithmetic, boolean algebra; digital systems components; assembly language and instruction set concepts and application.

**CSE 240: Introduction to Programming Languages** -Introduces the procedural (C/C++), applicative (LISP/Scheme), and declarative (Prolog) languages.

**MAT243: Discrete Mathematical Structures** - Logic, sets, functions, elementary number theory and combinatorics, recursive algorithms, and mathematical reasoning, including induction. Emphasizes connections to computer science.

**MAT267: Calculus for Engineers**- Vector-valued functions of several variables, partial derivatives, multiple integration. **OR Mat 275: Modern Differential Equations** - Introduces differential equations, theoretical and practical solution techniques. Applications. Problem solving using MATLAB.

Term 4:

**SER216: Software Enterprise II** - Project-centered course covering testing and quality in software engineering; concepts, tools, and methods in testing and quality management; teamwork and communication in software engineering. Project based.

**SER222: Data Analysis of Data Structures and Algorithms** - Data structures and related algorithms for their specification, complexity analysis, implementation and application. Sorting and searching. Professional responsibilities that are part of program development, documentation and testing.

**CSE 230: Computer Organization & Assembly Language Programming**-Register-level computer organization. Instruction set architecture. Assembly language. Processor organization and design. Memory organization. IO programming, Exception/interrupt handling.

**EGR280: Engineering Statistics** - Applications-oriented introduction to statistics with computer-based experience using statistical software for formulating and solving engineering problems.

**PHY121/122: University Physics Mechanics 1 Mechanics and laboratory** - Kinematics; Newton's laws; work, energy, momentum, conservation laws; dynamics of particles, solids, and fluids. Both PHY 121 and PHY 122 must be taken to secure SQ General Studies credit.

Term 5:

**SER315: Software Enterprise I: Tools and Process** - Introduces tools and techniques used in software enterprise/development, including coding, design, testing, configuration management, and personal process management.

**SER334: Operating Systems and Networks** - Fundamentals of operating systems, process management, scheduling, synchronization techniques and file management. Network technology, topologies, protocols, application control; network and operating system security.

**MAT343: Applied Linear Algebra** - Solving linear systems, matrices, determinants, vector spaces, bases, linear transformations, eigenvectors, norms, inner products, decompositions, applications. Problem solving using MATLAB.4

**HST318: History of Engineering** - The history of engineering from the earliest record to modern times, examining the social, cultural, and economic effects on society.

**Lab Science Sequence:** PHY 131/132 or CHM113 & 116 or GLG 101/103 & GLG102/104 or BIO 181 & 182 or BIO201 & 202. Students taking PHY131/132 will need to select 4 more hours of lab science from approved list, i.e. CHM, BIO, GLG.

Term 6:

**SER316: Software Enterprise II** - Construction and Transition – Best practices in Software construction in the context of a team project, including refactoring, defensive programming, unit testing, and configuration and release management.

**SER321: Software Systems** - Design and implementation of distributed software components; process and memory management underlying software applications; sockets, protocols, threads, XML, serialization, reflection, security, and events.

**Lab Science Sequence:** PHY 131/132 or CHM113 & 116 or GLG 101/103 & GLG102/104 or BIO 181 & 182 or BIO201 & 202. Students taking PHY131/132 will need to select 4 more hours of lab science from approved list, i.e. CHM, BIO, GLG.

Term 7:

**SER415: Software Enterprise III: Inception and Elaboration** - Third course in the four-course enterprise sequence. Students perform inception (project launch) and elaboration (requirements analysis) activities in project teams.

**SER 401: Computing Capstone Project I** – First half of a comprehensive project experience based on cumulative knowledge and skills gained in earlier coursework.

Term 8:

**SER416: Software Enterprise IV: Project and Process** – Project-centric course focusing on applying software process project management, and technical leadership. Final course in the software enterprise sequence.

**SER402: Computing Capstone Project II** – Second half of a comprehensive project experience based on cumulative knowledge and skills gained in earlier coursework.
