

School of Computing & Augmented Intelligence
Engineering Management, BSE (ESEMGBSE)
Updated: 2023-2024 Catalog Year Requirements

Name: _____
 Student ID#: _____

NOTES: † International students may take ENG 107 and ENG 108. Students placing in to ENG 105 will replace ENG 101 with a recommended course
 ** See SCAI Advising Center or SCAI Website (<https://scai.engineering.asu.edu/engineering-management-bse/engineering-management-degree-requirements-ground-campus/>) for degree requirements and Focus Area Requirements
 + All upper-division courses (including IEE and Focus Area Electives) require additional prerequisites. Please check the catalog for specific information.
 # All pre-requisite coursework must be completed prior to taking IEE 485 (IEE 321; IEE 369; IEE 458; ENG 101, 105, or 107)
 Shaded courses designate "Critical Requirements" and must be completed as described above to remain on - track. Off - track twice students will be required to change their major. Minimum "C" grade is required in all major courses (see major map for details)
 All ASU students must complete required general studies including, 2 lower division HU, 2 lower division SB, one upper division HU or SB and 1 class from each of the 3 Awareness Areas (AA)
 Prerequisite —> Co-requisite - - - ->

Cultural Global Historical

Term 1

ENG 101: First-Year Composition

ASU 101-IEE: The ASU Experience

FSE 100: Introduction to Engineering - Introduces the engineering design process; working in engineering teams; the profession of engineering; engineering models, written and oral technical communication skills.

MAT 265: Calculus for Engineers I - Limits and continuity, differential calculus of functions of one variable, introduction to integration. Not open to students with credit in MAT 270.

Basic Science Elective: Choose one of the following-BIO 181, BIO 182, BME 111, GLG 101, GLG 102, GLG 110, CHM113, PHY 241.

HU & Awareness Area: Humanities, Arts, and Design

Term 2

ENG 102: First-Year Composition

ECN 212: Microeconomics Principles - Basic microeconomic analysis. Theory of exchange and production, including the theory of the firm.

CSE 110: Principles of Programming with Java - Concepts of problem solving using Java, algorithm design, structured programming, fundamental algorithms and techniques, and computer systems concepts. Social and ethical responsibility.

MAT 266: Calculus for Engineers II - Methods of integration, applications of calculus, elements of analytic geometry, improper integrals, Taylor series.

PHY 121/122: University Physics I: Mechanics and laboratory - Kinematics; Newton's laws; work, energy, momentum, conservation laws; dynamics of particles, solids, and fluids. Both PHY 121 and PHY 122 must be taken to secure SQ General Studies credit.

Term 3

CHM 114: General Chemistry for Engineers or CHM 116: General Chemistry II (pre-req is CHM 113). Students who take CHM 113 for Basic Science Elective must take CHM 116.

ACC 231: Uses of Accounting I - Introduces the uses of accounting information focusing on the evolution of the business cycle and how accounting information is used for internal and external purposes.

CSE 205: Object-Oriented Programming & Data Structures - Problem solving by programming with an object-oriented programming language. Introduces data structures. Overview of computer science topics.

MAT 267: Calculus for Engineers III - Vector-valued functions of several variables, partial derivatives, multiple integration.

Global Eng or Sustainability or Entrepreneurship Elective: Choose one of the following - ALA 102, CEE 181, FSE 301, PUP 190, SOS 100, 110 or 111.

Term 4

ACC 241: Uses of Accounting II - Introduces the uses of accounting information focusing on the evolution of the business cycle and how accounting information is used for internal and external purposes.

IEE 380: Probability and Statistics for Engineering Problem Solving - Applications-oriented course with computer-based experience using statistical software for formulating and solving engineering problems.

Math or Science Elective: (depends on Industry Focus Area)

SB: Social Behavioral Science (PSY 101 recommended)

HU & Awareness Area: Humanities, Arts, and Design

Term 5

IEE 300: Economic Analysis for Engineers - Economic evaluation of alternatives for engineering decisions, emphasizing the time value of money.

MGT 300: Organization & Management Leadership - Analyzes strategic, behavioral, and human resource management perspectives, including principles of strategic management and leadership of human resources.

IEE 320 Extreme Excel - Today's workplace environment for Engineers demands advanced skills in using worksheet applications such as Microsoft Excel. Course addresses this important gap in the curriculum to provide support for students who are in need of training on the various capabilities of the software. In particular, students become familiar with various functionalities that are critical for performing their jobs as engineers.

MAT 342 or 343 Applied/Linear Algebra-Solving linear systems, matrices, determinants, vector spaces, bases, linear transformations, eigenvectors, norms, inner products, decompositions, applications. Problem solving using MATLAB.

IEE 431: Engineering Administration - Introduces quantitative and qualitative approaches to management functions, engineering administration, organizational analysis, decision making, and communication.

Industry Focus Area Elective: (see the Major Map for options or meet with CIDSE Advising)

Term 6

IEE 458: Project Management - Life-cycle processes for selecting and managing large-scale projects to ensure successful completion. Topics include project phases, defining milestones, work breakdown structure, group decision making and teamwork, organizational structure, human resource management, technological and economic feasibility, configuration management, budget control, and resource allocation and scheduling. Use of modern tools for planning and controlling project performance.

IEE 369: Work Analysis and Design (L) - Planning, analysis, and design of methods of accomplishing work. Emphasizes human factors, work planning, methods analysis and design, and work measurement. Applications in diverse fields.

IEE 321 Ethics and Tech Communication - Methods and tools for preparing students for work in industry including ethics, technical writing and communications; understanding how learned of six sigma methodology for business and quality improvement. Reviews the necessary statistical tools and illustrates their integration into the problem-solving process. Overview of lean principles and design for six sigma. Unique features of applying six sigma and DMAIC in transactional and service organizations.

IEE 477: System Dynamics and Thinking - Methods for the modeling and analysis of system dynamics; metrics to measure business performance; continuous simulation tools for evaluation of system performance over time.

Industry Focus Area Elective: (depends on Industry Focus Area)

Term 7

IEE 454: Risk Management - Methods and tools for identifying, assessing, mitigating and controlling risk in business and engineering design activities. Decision tools include cost-benefit analysis, decision trees, value of information, Bayesian statistical decision making, fault trees, and failure modes and effects analysis (FMEA).

HU & H: Humanities and Historical awareness area course

Industry Focus Area Elective: (depends on Industry Focus Area)

IEE 485: Systems Design Capstone I - Senior capstone project provides students with the skills required to effectively complete a capstone project in design and development.

Math or Science Elective: (depends on Industry Focus Area)

Term 8

Upper Division HU: Humanities

IEE 456: Introduction to Systems Engineering - Foundation course addressing the concepts needed for successful system planning, design and build process. Topics include successfully bringing large-scale systems to completion on schedule and on budget, modeling and cost estimating techniques, risk and variability.

Upper Division Industry Focus Area Elective: (depends on Focus area)

IEE 486: Systems Design Capstone II - Project in design and development. Individual or team capstone project in creative design and synthesis.
